MALEK FERJANI

IBM Maximo Technical Consultant | Java Integration & Development

Tunis, Tunisia · ferjenimelek42@gmail.com · +216 50 532 972 · LinkedIn · Portfolio

PROFESSIONAL PROFILE

IBM Maximo technical consultant with over 3 years of experience integrating solutions (Maximo 7.6, MAS, OpenShift) for an industrial water-utility client, as part of an international engagement led from France. Hybrid profile combining requirements gathering and functional design (user workshops, specifications, Proof of Concept) with strong technical expertise: business object (MBO) customization, Automation Scripts, OSLC/MIF integrations, Java microservices. Solid Java/Python/Shell/SQL background and proficiency in Windows/Linux environments. Hands-on Cloud & DevOps practice (AWS, Azure DevOps, Docker, Kubernetes, Terraform, Ansible) gained by building and administering my own platforms. Comfortable documenting and defending technical choices with clients, and passing on best practices to junior profiles. Experienced working in multi-country Agile teams; fluent English, written and spoken.

PROFESSIONAL EXPERIENCE

Full-Stack & DevOps Developer — Sinorfi (internal role) 2025 – Present

- Design and development of internal web and mobile solutions (Java Spring Boot, Angular, Flutter), with a strong DevOps component: CI/CD, Docker/Kubernetes containerization, infrastructure automation.

N3 Technical Consultant, IBM Maximo — SUEZ France Assignment 2023 – 2025

Integration and development on IBM Maximo Application Suite for an industrial water-utility client (SUEZ), within an Agile team split between Tunisia and France; development of a third-party web application integrated via OSLC/REST.

Analysis & Design

- Gathered and analyzed client requirements through user workshops; designed and modeled business processes prior to their implementation in Maximo.
- Wrote technical documentation (scoping studies, functional and technical specifications) and built Proof of Concepts to validate technical choices before industrialization.
- Contributed to arbitrating between business needs and technical feasibility, working directly with functional teams and the client.

Maximo Development & Integration

- Advanced customization of business objects (MBO): Java class extensions, calculated attributes, and overridden validation/save logic to implement complex business rules.
- Automation Scripts (Jython/JavaScript), secure REST APIs, and OSLC integrations (assets, work orders, locations); MIF channels connecting Maximo to ERP and third-party applications.
- Developed a third-party web application (Spring Boot/Angular/React) integrated with Maximo via OSLC/REST for intervention scheduling.
- Functional configuration (objects, domains, classifications, security groups), lifecycle workflows (Workflow Designer), and UI customization (Application Designer).

Cloud, DevOps & Reporting

- CI/CD pipelines (GitLab CI, Jenkins, Azure DevOps) with Docker, Kubernetes, Terraform, and Ansible; Shell scripts to automate dev/test/prod environments; deployment and administration of the suite on OpenShift.
- BIRT reports and Cognos Analytics dashboards for tracking maintenance KPIs.

PERSONAL PROJECTS

- **Multi-Node Kubernetes Platform on OpenStack** (OpenStack Heat · Ansible · Kubernetes · Vault · Prometheus) — Production Kubernetes cluster provisioned end-to-end via Heat/Ansible, secured (Vault, cert-manager, Falco, Trivy, kube-bench), and monitored (Prometheus/Grafana).
- **SecureGitOps — Secure Kubernetes Platform (in progress)** (Terraform · LocalStack · ArgoCD · Kyverno/OPA) — DevSecOps portfolio: IaC, secure CI/CD, GitOps/service mesh, security policies, observability.
- **Self-Hosted K3s Home Server** (K3s · Docker · Nginx · Ollama) — Personal K3s cluster hosting websites and local LLM inference (Ollama/Qwen).
- **IBM OSLC Integration Application** (Angular · React · Spring Boot) — Third-party intervention scheduling application integrated with Maximo via OSLC.

TECHNICAL SKILLS

IBM Maximo: MBO · Automation Scripts · MIF · OSLC · Workflow Designer · Application Designer · Domains/Classifications/Security · BIRT · Cognos Analytics · Maximo 7.6 · MAS · OpenShift

Languages: Java · Python · Shell · SQL · JavaScript/TypeScript · Jython

Environments: Windows · Linux

Cloud & DevOps: AWS · Azure DevOps · Kubernetes · Docker · Terraform · Ansible · GitLab CI/CD · Jenkins · Helm

Frameworks & Data: Spring Boot · Angular · React · Flutter · PostgreSQL · Oracle · MySQL · REST · SOAP · Microservices

CERTIFICATIONS

Maximo & IoT: Maximo Application Suite – Sales Foundation (valid, exp. Jul 2026) · Maximo Visual Inspection – Technical Sales Intermediate (valid, exp. Jul 2026) · IoT – Maximo 7.6 New Features (Dec 2023) · IoT – Maximo Introduction and Overview (Dec 2023)

Analytics & Business Intelligence: Cognos Analytics – Technical Sales Intermediate (Jun 2024) · Cognos Analytics – Sales Foundation (Jun 2024) · Planning Analytics – Technical Sales Intermediate (Jul 2024) · Planning Analytics – Sales Foundation (Jun 2024)

SOFT SKILLS

Strong interpersonal and written/verbal communication skills, comfortable defending a technical viewpoint while remaining open to feedback · Analytical and synthesis skills · Technological curiosity and autonomy · Customer-service mindset, developed daily through direct contact with the end client on an international assignment.

EDUCATION & LANGUAGES

Engineering Degree — Cloud & Cybersecurity · ESPRIT, Tunis · 2023 – 2027

Bachelor's Degree — Networks & Telecommunications · ISITCOM, Hammam Sousse · 2020 – 2023

Arabic (native) · French (B2) · English (B2)
